Commercial Invoice for FedEx Express

This is a document provided by the seller/exporter that describes the parties involved in the shipping transaction and the goods being transported. It is the primary document used by Customs. It should be prepared using the official language of the country to which the goods are being exported, if possible. The Commercial Invoice for FedEx Express should include a detailed breakdown of all items included in the shipment, including: a proper description of the goods (what is it? what is it made from? what is its intended use?) the quantity, the country of manufacture, the price or cost, currency used, the Harmonized System number for each commodity and the terms of delivery. The document shown is an example of one format. Some countries require that an original invoice be executed on the shippers letterhead. The invoice should always be signed and dated by the exporter certifying that the details provided are true and correct representations of the contents covered by the Commercial Invoice for FedEx Express.

3. Choose which document you would like to print with your shipment.
